What is a Neighborhood Scorecard?

- It is a tool to surface data and see how it evolves over time.
- It is a tool to help guide our work.
- It is a tool to spark discussion with stakeholders.
- It makes place-based data transparent to residents.
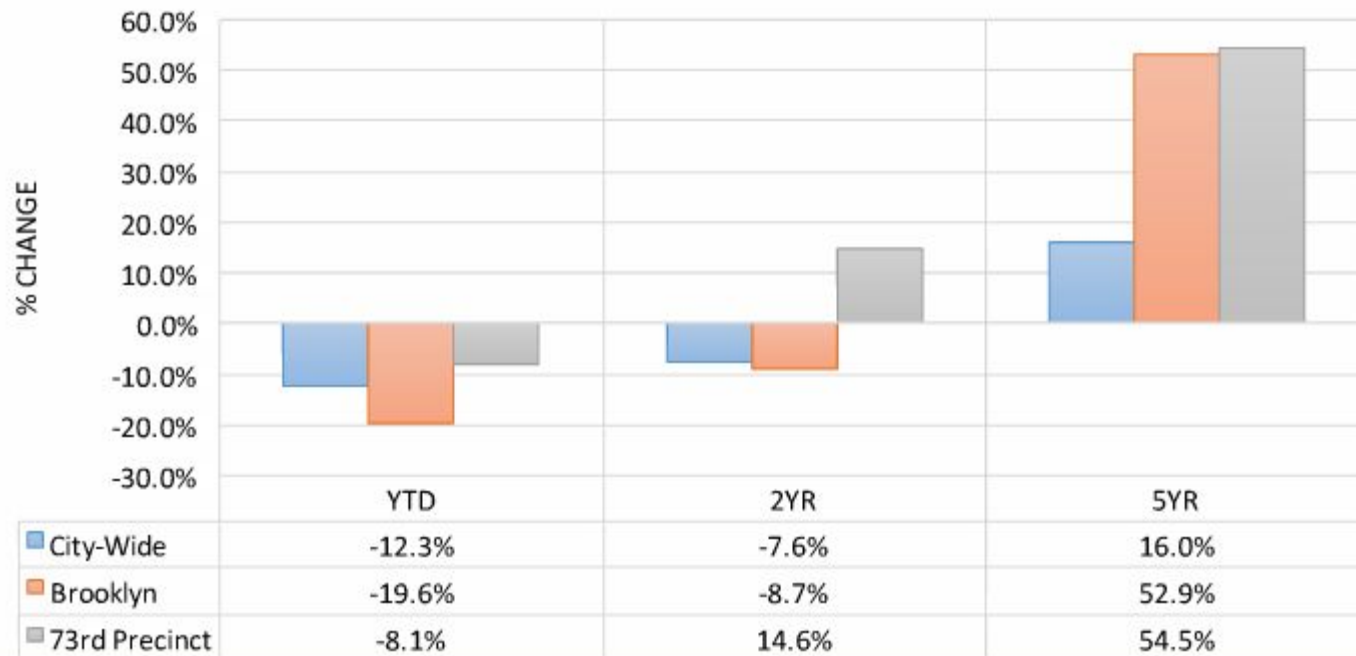

Why a Neighborhood Scorecard?

- To understand performance in areas important to us
- To call attention to areas of strength and areas needing improvement
- To compare current performance with past performance
- To be able to set targets for improvement
- To compare performance with others
- To improve performance (what gets measured, gets improved)

The Goal

A Neighborhood Scorecard can be a way to determine if interventions are having an impact on the neighborhoods we serve
